When marble is combined with glass,  
aesthetics become structural.

MINERAL  
EXPERTISE

# Mineral Expertise →

Hauteville Quarry – Mineral Expertise Group

Mineral Expertise is a group specialized in the extraction and processing of natural materials (marble, onyx, granite, etc.). The group operates its own quarries and two European processing sites: a Factory 4.0 in France (near Lyon) and another in Pietrasanta, Italy.

The group is also highly skilled in honeycomb-backed marble technology, which is fire-resistant and certified by a Technical Assessment from the CSTB (No. 3040-V1).

- Double and Triple Glazing
- SSG (Structural Sealant Glazing)
- Silk-screening and Tempering
- Laminated Safety Glass
- Bullet and Blast Resistant
- Fire-rated (Integrity and Insulation)
- Curved Glass: Monolithic, Laminated, or Double-glazed
- EVA Creation
- PVB, EVA, and SentryGlas Lamination

AGC SKYLINE is a French glass processor specializing in architectural facades. The facade market requires an extensive and constantly innovating product range.

At its Troyes and Lyon sites, AGC SKYLINE manages all processing stages of transformation in Jumbo dimensions (6000x3210).

# Glass and Stone...

...a combination that breaks through dimensional barriers

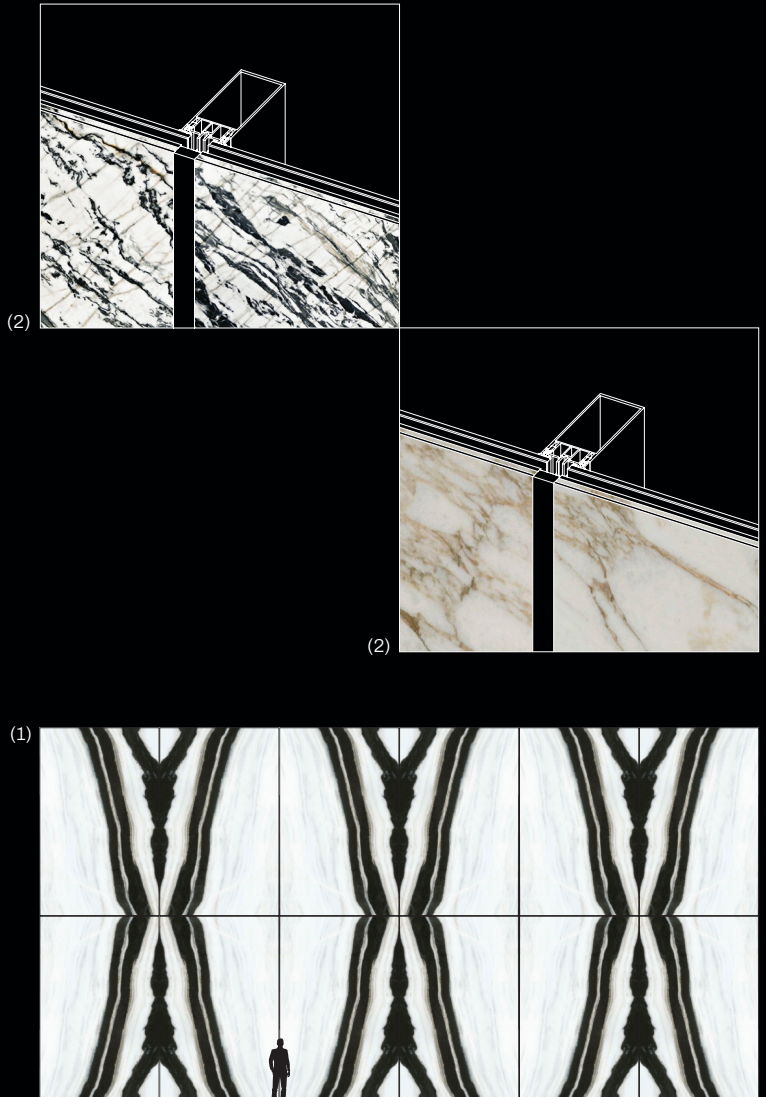

Eco Mineral Glass: an advanced solution developed by two visionary companies, enabling the creation of unprecedented large-scale marble facades. This unique partnership, based on a patent, overcomes the dimensional limits of marble by combining it with glass.

Glass becomes structural, enabling marble slabs of up to 5000x3200 mm (1) while highlighting the stone's natural beauty. These unlimited creative possibilities add a new dimension to architectural projects.

Facade contractors can now install large-scale marble facades without changing standard installation techniques (2). This innovation integrates marble into the curtain wall family, Thus, expanding the architectural possibilities by combining timeless marble aesthetics with the functional benefits of modern facade systems. Architects can now design buildings that pair the prestige of marble with the lightness and transparency of curtain walls.

Contact us to discuss how we can support the completion of your most ambitious projects.
